

Introducing

Beaverscrews® are advanced premium wood screws which feature a superb shank giving a fast insertion speed and incredible pull out resistance compared to your average wood screw. Beaverscrews® also features a double countersunk head, 6 Nibs under head and sharp point for fast pick up. Beaverscrews® can be used in hardwood, softwood, chipboard and MDF for satisfying results every time!

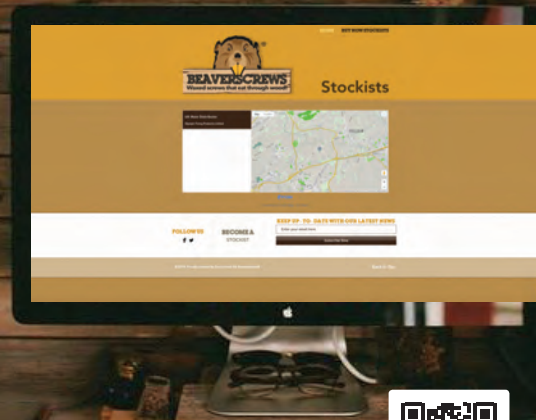

Sizes to suit all...

Available in:

- M4 x 20, 25, 30, 40, 50, 60, 70
- M5 x 30, 40, 50, 60, 70, 80, 90, 100

NEW Product

EAT THROUGH WOOD!

"Simply the best screw you'll have had in ages!"

Strong & Reliably Effective

Higher performance wood screw

The Head

- Double Countersunk
Improved strength to prevent head breakage
- 6 Nibs Under Head
Helps to self countersink the head smoothly into timber
- Deep Punched Pozi Recess
Provides a positive precision fit between bit and screw reducing "cam out" and allowing high torque transfer

The Hardened Body

- High Specification Material
*C1022 carbon steel wire, hardened to 550 – 800 HV 0.3
Increases strength and for faster installation*
- Milling / Reaming Mid Section
Gently increases hole diameter to reduce torque requirement and prevent jacking
- Deep Cut Thread
Allows higher pull out loads
- Type 17 Sharp Point
Helps fast starting and offers reduced splitting, allows precision positioning
- Fully Threaded Below 40mm
Helps to tightly clamp timber together

Additional Benefits

- Self Lubricating
Quality wax coating for faster insertion, reduced splitting and vastly reduces energy consumption
- Zinc Plated and Yellow Passivated
3-5 Micron coating providing good corrosion protection
- Suitable for most wood types
*Will work in soft and hardwood, chipboard, MDF etc.
Also screws into most hardwoods without pre-drilling*
- CE Approved for Load Bearing Timber Constructions
Full CE approval to EN14592:2008
