

Olympic Flat Packers

Typical Application

- Suitable for accurate positioning of window and door frame assemblies
- In addition to their primary function of supporting glass double glaze units within timber, U- PVC and aluminium window frames, they are used in hundreds of different applications in construction and DIY projects such as levelling of battens, timber subframes, installation of door and window frames, drylining, levelling of kitchen and bathroom furniture, counter tops, sanitary ware, decking, garden buildings, first and second fix joinery and many other situations which require shimming, packing or levelling.
- When filling a space or gap, always use the largest size possible to minimize the number of packers needed.

Product Specification

- Range of thicknesses to suit many applications
- Colour coded to indicate thickness
- Manufactured from polypropylene
- Available in 100 x 28mm and 100 x 32mm sizes to suit most frames
- Available in single thickness large or small packs and mixed thickness small packs
